Introduction

The Age of Awareness

WE ALL HAVE QUESTIONS WE'D LIKE TO ASK GOD. WHY IS MY LIFE SO difficult? Why did my loved one have to die? Why can't I be successful? Why do I feel so disconnected? Why did I get sick? Why is there so much injustice? How can I be more connected with myself and my loved ones? What happens when I die? Will I know my loved ones on the other side? *Is* there an "other side" and what is it like? Does heaven exist? What about reincarnation and soul mates? And is there an infinite knowledge in the universe that I can connect with and use to help make my life better here on earth, or am I just a random by-product of the chemical processes we call life?

Human beings have been seeking answers to these questions throughout recorded history. Some of their answers are based on faith; some on scientific data; some on fantasy. But a few answers—very few—are based on the actual experience of tapping in to a realm beyond this physical world, where we can speak directly with energies we call "spirits," and, more important, where we can connect directly with the highest level of universal and infinite love, wisdom, and light that we call God.

We connect with these other realms through our inborn sixth sense—our intuition. This God-given power is a direct connection between each soul and the universe. I was lucky enough to discover this intuitive power within myself at a very young age. As a child I was able to see spirits, read thoughts, and foresee events. At first my abilities frightened me because I did not understand them, but eventually I

came to accept them as a gift from the universe. I learned (and continue to learn) from others, as well as through my own efforts, how to develop my intuition to its fullest extent. And ultimately, I learned how to teach others to develop their own intuition as well.

You see, I know with absolute certainty that, in the same way animals have instinct, *every human being has intuition*. It's inherent in our makeup, in the same way we have sight, hearing, touch, taste, and smell. We use our intuition unconsciously all the time in ways too numerous to mention. But intuition can be so much more than something that just helps you find the jewelry you lost or tells you if your child is in trouble. Our intuitive sense is literally a channel between this world and the next. It's an energy conduit through which we can connect with loved ones who have died, speak to our guardian angels and spirit guides, and even touch the highest level of universal consciousness and love.

My purpose for being on this planet is to help others recognize, develop, and use their God-given intuitive abilities to ease suffering and grow in goodness, love, compassion, and wisdom. My mission is to help take away fear—the fear of death, by proving that we don't die and will see our loved ones again, and the fear of living, by showing how we can tap in to our wisest selves and make our lives much happier and easier. My desire is to help each of us connect to the love that is eternal, that is the reason for our existence.

Awakening to our own intuitive powers is more important than ever, because I believe that humanity is going through a metamorphosis—from a material world to a spiritual one. We're moving into a new age of spiritual awareness, a whole new phase for the human race, a time when we must learn to balance the spiritual *and* material. I call it the Age of Awareness, because I believe it's a time when we all will have to become aware of the enormous power we possess.

In the Age of Awareness, we each must take responsibility for our thoughts and our deeds. Human beings have the power to destroy or heal both themselves and the planet. We must learn that the choices we make will reverberate throughout the universe, affecting not just our own lives but the lives of countless others. We must learn also that our choices, thoughts, and deeds will affect what happens to our spirits when we die. And I believe we must finally awaken to the immense power of our own sixth sense.

As a professional psychic intuitive for the past twenty-five years, I have been associated with many people who were part of what's called the "New Age" movement. Truthfully, however, I believe much of the "New Age" was really "Old Age" in disguise. People sought to return to humanity's deepest roots of culture, religion, nature, trying to connect with the power they sensed in themselves and in the universe. But all too often it seemed that they got caught up in the forms they chose. They failed to recognize that all paths lead to the same place, and the best, most direct path to God does not rely on outer forms, but on a direct connection with the universe from within ourselves—a connection that flows naturally through our own intuitive channels, as long as we don't block them with doubts, fears, and misconceptions.

I have written this book in the hopes people everywhere will read it and awaken to their own instinctive, intuitive abilities. I'm not here to "convince" anybody. I don't have to. There are already thousands of documented cases of people who have had near-death experiences. There are many others who have seen and heard spirits, or been warned about something, or found their soul mates. I don't feel I have to convince the world that intuition is real. But for those people who do have an interest, who have had an inkling of that inexplicable sixth sense, who want to connect with loved ones who have passed away, I hope this book will show them they're not alone or crazy—in fact, they're surprisingly ordinary, because everyone has a psychic/intuitive gift.

Intuition has enormous power for either good or evil. Each of us must choose how we will use this power in our own lives. My wish, my desire for you is that in reading this book you will recognize your intuitive gifts, utilizing them as your best guide to the Age of Awareness and thereby bringing peace, healing, and love to yourself and others. Trust your intuition; it can provide the answers you seek from Heaven.
